Automotive File Explorer

One tool for all

The Automotive File Explorer (AFE) is a universal system that can read, edit, write and convert common file formats of the automotive industry.

AFE is like the Swiss army knife among development tools. It is small, pragmatic, flexible and affordable. It is a tool for every development team and requires no expertise.

What is AFE?

AFE is an easy to use data analyser

AFE displays all information in a readable human format

AFE is able to merge all information from different sources

AFE supports simple data analysis

Your benefits
